

FOR IMMEDIATE RELEASE:

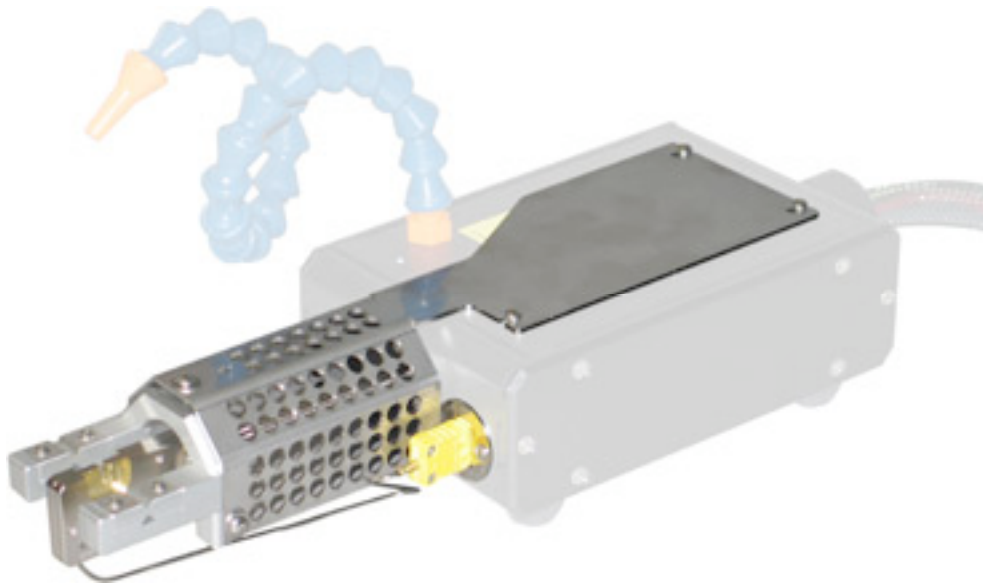

**New System Upgrade Optimizes Performance for Industry Standard
Balloon Development System**

Silicon Valley Company Releases Add-on Accessory for New or Existing Product Enhancement

Los Gatos, CA – (September, 2010) Beahm Designs Inc., announces the release of a product designed to improve performance for hot air applications. The AC100 easily attaches to existing systems for enhanced functionality and performance. Users are reporting increased output of up to 80%, significantly enhanced user safety control and reduction in operator error.

Optimizes Performance, Increases Output

The AC100 assists operators in formulating a wide range of applications for tubing, bonding, balloon blowing and processing options. Catheter manufacturers benefit from the ability to perform highly precise bonds for demanding applications including tubing bonds, balloon blowing, and recovery.

###

About Beahm Designs *Since 1990 Beahm Designs is recognized as a global leader in designing, producing and supplying proven and cost-effective solutions to meet catheter design and manufacturing demands. Located in the heart of Silicon Valley, this privately held company combines innovation and quality with competitive pricing, short lead times and excellent customer service. From tipping and necking to fusing, bonding and shrinking, Beahm Designs provides a full spectrum of proven solutions to catheter manufacturers worldwide.*
